HOW TO KEEP YOUR
DSD INSTRUCTOR CERTIFICATION

HOW TO KEEP MY DSD INSTRUCTOR® STATUS?

– Every 2 years, all DSD Instructors need to assist a Residency 1 or Master's Meeting (for free)
– Every DSD Instructor must submit 1 case presentation per year, designed by the DSD Planning Center® and using the 2D part of the DSDApp®, that will be evaluated by the DSD Faculty. Information about the presentation requirements will be sent attached to an email every year to all DSD Instructors
– Must enroll 1 DSD Concept course a year (and a minimum of 25 students per year)

REQUIREMENTS NEEDED FOR THE CASE PRESENTATION:

– Good quality of photo and video documentation
– 2D design (DSD step-by-step) with the final 2D project on the 3 views of DSD (frontal, occlusal and 12 o'clock);
– Quality of the Mock-up and facial integration (facial portraits with mock-up);
– Quality of Emotional/Motivational portraits and video with mock-up for the slide presentation for the patient;
– Treatment plan according to Smile Design project. A summary of the treatment plan should be written on the slide;
– Quality of clinical steps involved on the case (e.g. tooth prep, impression, provisional, perio surgery, implant placement, cementation, ortho, occlusal adjustment);
– Final outcome and final restorations (or final results);
– Quality of the slide presentation in general (layout);
– The documentation of the finalized cases (photos and videos) must be the same as the pre-op ones so we can compare the final outcome in all DSD views (frontal, occlusal and 12 o'clock).

SEQUENCE OF THE SLIDES ON THE PPT/KEYNOTE PRESENTATION:

- PATIENT INTRO
- PRE-OP photo/video documentation
- PATIENT DOCUMENTATION (x-rays, questionnaire, perio chart, etc..)
- DSD SEQUENCE (the 8 steps of the Smile Design: midline, smile curve, interdental proportion, central proportion, gingival curve, papilla curve, 12 o'clock, occlusal arch)
- 2D SMILE DESIGN/planning (made with the DSD App)
- 3D SMILE DESIGN + frame on the 3 views (frontal, occlusal, 12 o'clock)
- WAX UP quality control
- SLIDES to present the mock up to the patient
- TREATMENT PLAN presentation
- CLINICAL PROCEDURE. Main clinical steps (gingivoplasty, prep, ortho, provisionals, etc)
- FINAL OUTCOME. Besides intra oral photos of final outcome, all 4 DSD angles should be shown on portrait photos as well (frontal, occlusal, profile and 12 o'clock). The same video protocol done on the pre-op documentation should be repeated on the final situation.

For more information about the Instructor status, contact: gerardo@digitalsmiledesign.com

For more information about the presentation and evaluation of the yearly case, please contact: carmen@digitalsmiledesign.com

* If it's been consider that the case presentation needs a correction or feedback, you will have 6 months to send back the new presentation.

The DSD Faculty reserves its right to at any point suspend this certification should any of the above mentioned conditions not be met or for any other reason not listed in this document.
